# Welcome to S&E-Glassdesign

As the name expresses, working with glass is the core competence of our company. Glass can be used in many ways as part of the modular structure of modern architecture and has become the focus of outstanding design. It is a prerequisite that the product meets the functional requirements but customers have become more demanding and also look for an added value on an emotional level.

Our shower cabins meet these criterias through their functionality and techni-

cal perfection and our styling expresses modern lifestyle and creativity in a convincing way. S&E products combine form and function which are tailored to individual tastes by our creativity.

In order to be successful, a manufacturer must put the customer in the centre of his strategy and must be creative to react to customer requirements in the shortest possible time. Our products must fulfill the functional and economical requirements as well as meeting social and cultural needs.

Our core product is the frameless shower glass partition which opens up new opportunities in the bathroom design by its transparent structure and ultimate elegance. The bathroom, long neglected in domestic architecture, has undergone a renaissance in recent years towards the attributes of lifestyle and creativity.

This is exactly what we are striving for, our products reflect style and personality. We will find a solution for all thinkable situations in the

bathroom applying our patented, innovative designs and meeting highest quality standards in terms of material and finish making our partitions withstand even extreme forces.

So it is the combination of functionality with outstanding design and top quality that makes our products unique on the market.

All materials used by S&E Glassdesign are exclusively made in Germany.

Please ask your retailer for a copy of our planning advice when purchasing.

# Shower Partitions\_Walk In Solutions

### Bespoke fixed panels

The S&E fixed panel concept is that we allways bespoke to suit your environment, personalising to the smallest details thus achieving an uncompromised finish and sence of imagination every time you admire it, transforming the most simple of ideas into an individual statement in the bathroom.

This section takes you through some case studies that are unquestionable bespoke.

The bathroom on the right shows two connected shower panels at 90 degrees with L brackets and through-glass support bar, combined with a frosted wc-partition.

Sizes are a completely flexible subject to access.

### Type L1

The Type L1 walk in enclosure consists of a large fixed panel with 90 degree mitred UV bond return panel. The construction is made extremely rigid by the extra surface bonding area in the mitre joint and so will not require a support bar for sizes up to 1500mm wide.

The image on the right shows an enclosure 1850mm wide with diagonal bar. Other standard configurations of walk in solutions are shown on pages 82 and 83.

Please always call for technical advice when planning fixed panels not shown on these pages or glass to ceiling is required.

Please note that the prices in our current price list refers to standard dimensions.

# Shower Partitions\_Niche Solutions

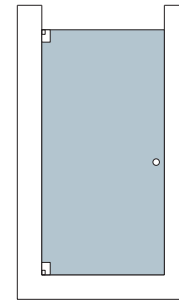

## Type 1

one pivot door

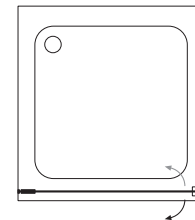

The S&E shower Type 1 is a turning door linked to the right or left and side of the shower niche. The door is linked with 180° hinges and opens to the inside or outside.

The Type 1 assembly includes the clear glass door with 2 hinges and one handle in glossy chrome finish plus all required tightening profiles.

front view

top view

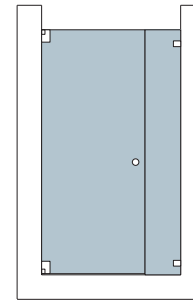

### Type 2

pivot door +  
inline side panel

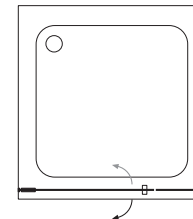

The S&E Type 2 consists of a door and a fixed side panel attached to the wall of a shower niche. The door can be fitted to both sides and is linked with a 180° hinge which opens to the inside or outside.

The Type2 assembly includes the clear glass door and a fixed partition plus two 180° hinges, wall fittings and one handle in glossy chrome finish plus all required profiles.

front view

top view

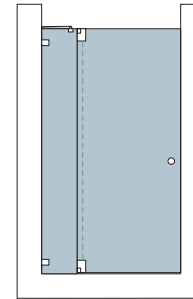

## Type 3

pivot door +  
fixed element

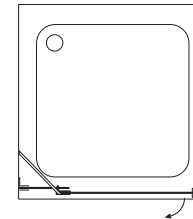

The S&E Type 3 consists of a turning door and a fixed side panel. The door is fitted to the partition, which is attached to the wall and stabilised by a bar. The door can be attached to the left or right hand side and opens outwards. Inline version also available.

The standard assembly of Type 3 includes a pivot door and a fixed side panel plus two 90° hinges, two wall fittings, one handle and a stabilising bar in shiny chrome finish. All required profiles are included.

front view

top view

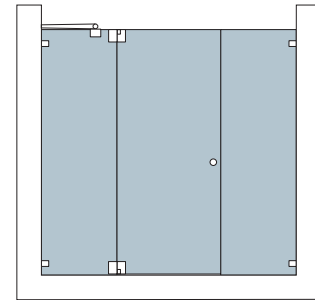

### Type 3\_PDP

pivot door +  
2 fixed elements

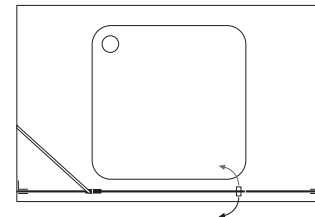

The S&E Type 3\_PDP consists of an inline turning door and 2 fixed side panel. The door is fitted to the partition, which is attached to the wall and stabilised by a bar. The door can be attached to the left or right hand side and opens inwards or outwards.

The picture to the right shows a S&E Type 3\_PDP with additional 2 diagonal roof cuts in the glass to suit the ceiling.

front view

top view

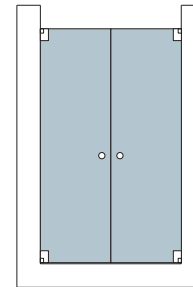

### Type 4

two pivot doors

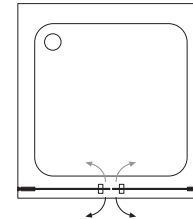

The S&E shower partition Type 4 consists of two pivot doors attached to the walls, the doors open inwards or outwards optionally.

The standard assembly comprises of two pivot doors, four 180° hinges and two door handles in shiny chrome finish. All required profiles are included as well.

top view

Please ask your retailer for a copy of our planning advice when purchasing.

# Shower Partitions\_Corner Situations 90°-Solutions

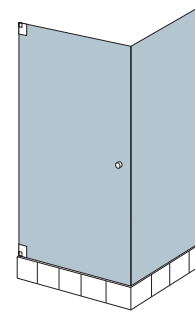

### Type 5

pivot door and partition

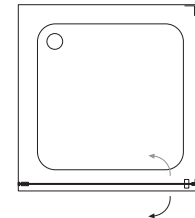

The S&E Type 5 consists of a pivot door and a fixed partition which are attached to the wall. The door opens outwards and can be mounted at the left or right hand side.

The Type 5 standard configuration is a pivot door and a side partition in clear glass, two 180° hinges, two wall brackets and a door handle all in shiny chrome finish. All required profiles are included as well.

front view

top view

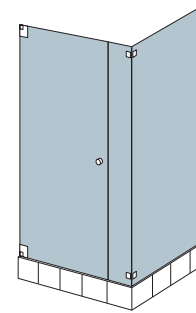

## Type 6

pivot door,  
partition and side panel

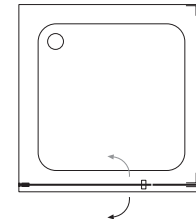

The S&E Type 6 is a corner solution with a pivot door mounted to the wall, a fixed partition with a side panel attached right- angled. The door can be mounted left or right and opens inwards or outwards optionally.

The standard configuration of Type 6 is a door, partition and side panel, two 180° hinges, two wall brackets, two 90° glass to glass connecting brackets and a door handle in chrome finish. All required profiles are included as well.

front view

top view

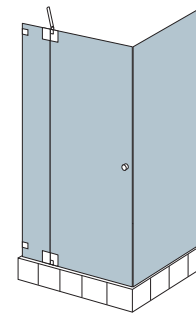

### Type 7\_inline

pivot door at  
side panel + partition

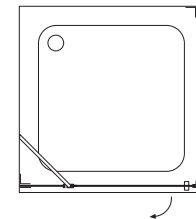

The S&E Type 7 is a corner solution with a pivot door mounted to a side panel and a fixed partition at a right angle. The door can be mounted left or right, opens outwards and is stabilized by a bar.

The standard configuration of Type 7 is a door, partition and side panel, two 180° hinges, four wall brackets and a door handle shiny chrome finish. All required profiles are included as well.

front view

top view

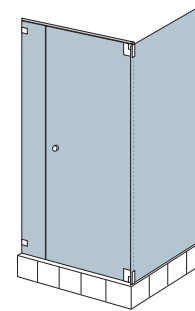

## Type 8

pivot door at  
side panel + partition

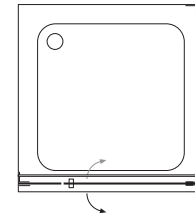

The S&E Type 8 is for corners with pivot door mounted to the fixed partition at a right angle and a side panel. The door can be mounted left or right and opens inwards or outwards. The partition is stabilised by bar parallel to the door and the side panel.

The picture to the right shows a S&E Type 8 with an additional fixed side panel making it a free standing, three sided solutions.

front view

top view

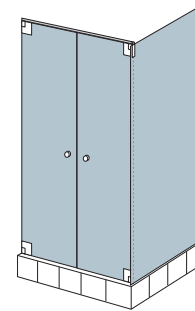

## Type 9

two pivot doors  
and one side panel

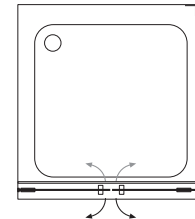

The S&E Type 9 is a corner solution with two pivot doors, one mounted to the fixed partition at a right angle and the other one to the wall. The doors can be opened inwards and outwards. The partition is stabilised by a bar parallel to the doors.

All glass screens are made of ESG clear glass. The two 180° hinges, four wall brackets, door handles and the stabiliser bar are made in shiny chrome finish. All required profiles are included as well.

front view

top view

## Type 9\_special

2 pivot doors  
+ 2 side panels

The S&E Type 9 special is a three sided, free standing shower partition consisting of two pivot doors which are both attached to side panels at a right angle. The doors can be opened inwards and outwards, the side panels are stabilised by a bar parallel to the doors.

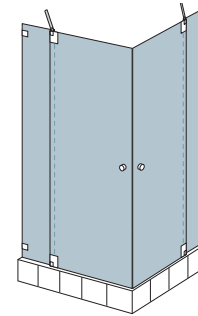

## Type 10

two pivot doors  
at two side panels

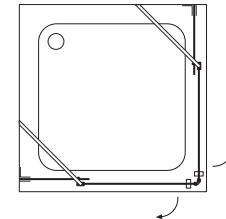

The S&E Type 10 is a corner solution with two pivot doors in a right angle which are attached to fixed side panels each. The doors can be opened outwards only. Each side panel is stabilised by a bar. Optional are hinges which allow the doors and side panels to be inline.

All glass screens are made of ESG clear glass. The four 180° hinges, four wall brackets, door handles and the stabiliser bar are made in shiny chrome finish. The kit also includes all required profiles.

Please ask your retailer for a copy of our planning advice when purchasing.

# Shower Partitions\_Sliding Doors

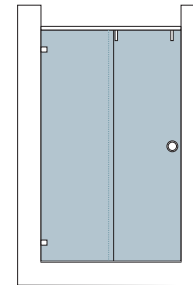

### Type S1

one stationary  
and sliding element

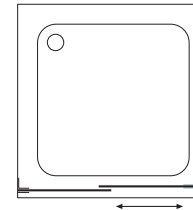

The S&E Type S1 is a niche solution consisting of a sliding door, which is being slid behind a stationary in line side panel. This frameless structure with a runway rail made of polished stainless steel requires no side or lower guide rails.

The S&E Type S1 assembly includes the clear glass sliding door, one fixed panel and fittings in polished chrome. The runway rail is available in polished stainless steel only.

front view

top view

### Type S2

two stationary  
+ two sliding elements

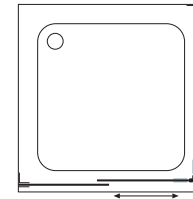

The S&E Type S2 is a corner solution consisting of two sliding doors, arranged at a right angle. Both doors slide behind a stationary side panel each.

This frameless structure requires no side or lower guide rails. The S&E TypeS2 assembly includes the two clear glass sliding doors, two fixed panels and fittings in polished chrome. The runway rail is available in polished stainless steel only.

front view

top view

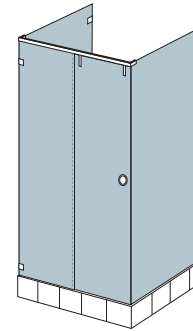

### Type S3

three stationary  
and one sliding element

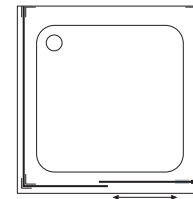

The S&E Type S3 is a three sided free standing solution with a single sliding door that runs behind a stationary inline panel. There are two further return side panels that make the solution free standing.

This frameless structure with a runway rail requires no side or lower guide rails. The runway rail works as a stabilising bar and is available in polished stainless steel only.

Please ask your retailer for a copy of our planning advice when purchasing.

# Shower Partitions Solutions with Dwarf Return

## Shower Partitions with Dwarf Return

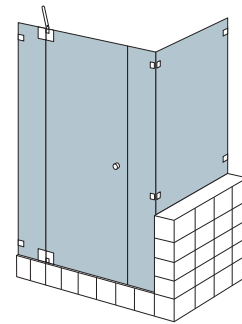

### Type B.3

Panel-Door-Panel  
with dwarf return

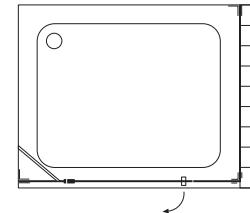

The S&E Type B3 is a two sided corner solution next to a bath tub. This space saving design includes a side panel that is able to sit directly on the tub edge eliminating the 'requirement' to build a dwarf wall. Other configurations of this solution are shown on page 88.

The Type B3 assembly includes a clear glass door, 2 inline panels and dwarf return. The 2 inline hinges, 6 wall brackets and a support bar are made in shiny chrome finish. The kit also includes all required profiles.

front view

top view

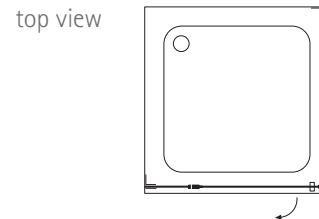

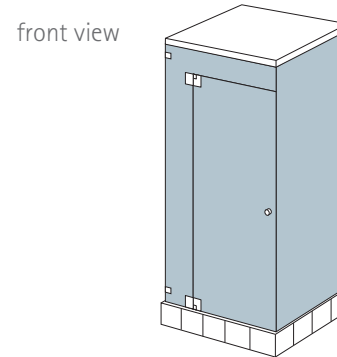

Please note that the prices in our current price list refers to standard dimensions.

## Shower Partitions for Steam Use

### Type Steam 4

The S&E Type Steam 4 is a 2 sided enclosure suitable upto 2.2m high. The inline panel is L shaped creating a one piece bulkhead that wraps over the top of the door and is UV bonded to the return.

A stud bulkhead is required to be built down in preparation for the frameless glass. Other configurations of this solution are shown on page 89. Please always ask for technical advice when planning a steam shower.

### Steam Shower — Special

The steam shower on the right is a 2 sided enclosure suitable up to 2.5m high thanks to it's separate bulkhead which allows the door to remain at 2m high but still achieving the elevation required.

A stud bulkhead is required to be built down in preparation for the frameless glass. This configuration is made up of Type 7 PDP + SP2. Please always ask for technical advice when planning a steam shower.

Please note that the prices in our current price list refers to standard dimensions.

Glass Design Unlimited

### Specials

S&E glass partitions are made to measure so that they fit 100% to your rooms and facilities. Don't keep to any standards which might restrict the planning and design of your bathroom. We manufacture to your individual ideas with top design and unmatched quality.

Due to the excellent quality and robustness of the S&E hinges and fittings as well as the 8mm tempered safety glass we are able to provide

unusual solutions in terms of measures, configurations and combinations, which are unique and never seen before.

Based on our experience we are able to meet any outstanding requirements by architects and interior designers, while working closely with them during the phase of planning.

Do not set your imagination any limits rather challenge us!

Please note that the prices in our current price list refers to standard dimensions.
